

LABORATORY RESULTS

Lipid Panel (Cholesterol)

Patient Name: Sarah Mitchell
Date of Birth: June 15, 1985
MRN: CTX-2024-001
Collection Date: February 20, 2026
Report Date: February 20, 2026
Fasting Status: 12 hours fasted

TEST RESULTS

Test Name	Result	Normal Range	Flag
Total Cholesterol	220	<200 mg/dL	BORDERLINE HIGH
LDL Cholesterol	142	<100 mg/dL	HIGH
HDL Cholesterol	55	>40 mg/dL (men) >50 mg/dL (women)	
Triglycerides	115	<150 mg/dL	
VLDL Cholesterol	23	<30 mg/dL	
Total/HDL Ratio	4.0	<5.0	

RISK ASSESSMENT:

Cardiovascular Risk: MODERATE

CLINICAL SIGNIFICANCE:

Total cholesterol is borderline high. LDL cholesterol is elevated.
Recommend lifestyle modifications including:

- Reduced saturated fat intake
- Increased physical activity
- Weight management if applicable

Follow-up lipid panel in 3 months recommended.
Discuss statin therapy with physician if levels remain elevated.
